

# Tianyun Tang

National University of Singapore  
Institute of Operations Research and Analytics  
ttang@u.nus.edu

## Appointments

---

<b>William H. Kruskal Instructor</b>	2025-present
Committee in Computational and Applied Mathematics, the University of Chicago,	United States

<b>Research Fellow   Advisor: Prof. Kim-Chuan Toh</b>	2024-2025
Institute of Operations Research and Analytics, National University of Singapore,	Singapore

## Education

---

<b>Ph.D. in Mathematics   Advisor: Prof. Kim-Chuan Toh</b>	2020-2024
Department of Mathematics, National University of Singapore,	Singapore

<b>Bachelor of Science in Mathematics and Applied Mathematics</b>	2016-2020
School of Mathematical Sciences, University of Science and Technology of China,	Hefei, China

## Research interests

- 
- Optimization
  - Scientific computing
  - Combinatorics

## Publications

- 
- **Monochromatic subgraphs in iterated triangulations**  
(with Jie Ma and Xingxing Yu) Electronic Journal of Combinatorics 27(4) (2020), P4.18.
  - **Minimizing cycles in tournaments and normalized q-norms**  
(with Jie Ma) Combinatorial Theory 2(3) (2022), #6.
  - **A feasible method for solving an SDP relaxation of the quadratic knapsack problem**  
(with Kim-Chuan Toh) Mathematics of Operations Research, 49(1) (2024), 19-39.
  - **Solving graph equipartition SDPs on an algebraic variety**  
(with Kim-Chuan Toh) Mathematical Programming, 204(1) (2024), 299-347.
  - **Self-adaptive ADMM for semi-strongly convex problems**  
(with Kim-Chuan Toh) Mathematical Programming Computation, 16(1) (2024), 113-150.
  - **A Riemannian dimension-reduced second order method with application to sensor network localization**  
(with Kim-Chuan Toh, Nachuan Xiao and Yinyu Ye) SIAM Journal on Scientific Computing, 46(3) (2024), A2025-A2046.
  - **A feasible method for general convex low-rank SDP problems**  
(with Kim-Chuan Toh) SIAM Journal on Optimization, 34(3) (2024), 2169-2200.

- **Accelerating nuclear-norm regularized low-rank matrix optimization through Burer-Monteiro decomposition**  
(with Ching-Pei Lee, Ling Liang and Kim-Chuan Toh), Journal of Machine Learning Research, 25(379) (2024), 1-52.
- **Optimization over convex polyhedra via Hadamard parametrizations**  
(with Kim-Chuan Toh) Mathematical Programming, accepted.
- **A Low-rank Augmented Lagrangian Method for Doubly Nonnegative Relaxations of Mixed-binary Quadratic Programs**  
(with Di Hou and Kim-Chuan Toh), Operations Research, accepted.
- **Exploring chordal sparsity in semidefinite programming with sparse plus low-rank data matrices**  
(with Kim-Chuan Toh), SIAM Journal on Optimization, accepted.

## Preprints

---

- **A Bregman ADMM for Bethe variational problem**  
(with Yuehaw Khoo and Kim-Chuan Toh), submitted.
- **An exact penalty approach for equality constrained optimization over a convex set**  
(with Nachuan Xiao, Shiwei Wang and Kim-Chuan Toh), submitted.
- **Stiefel optimization is NP-hard**  
(with Zehua Lai and Lek-Heng Lim), submitted.
- **RiNNAL+: a Riemannian ALM solver for SDP-RLT relaxations of mixed-binary quadratic programs**  
(with Di Hou and Kim-Chuan Toh), submitted.

## Teaching

---

- MA1521 Calculus for Computing, semester 2 AY2021/22
- DSA3102 Essential Data Analytics Tools: Convex Optimisation, semester 1, AY 2022/23
- MA3252 Linear and Network Optimization, semester 2, AY 2022/23
- DSA2102 Essential Data Analytics Tools: Numerical Computation, semester 1, AY 2023/2024

## Referee for journals

---

- Operations Research
- Mathematical Programming
- SIAM Journal on Optimization
- IEEE Transactions on Signal Processing
- Journal of Optimization Theory and its Applications
- Journal of Global Optimization
- Acta Applicandae Mathematicae

## Talks and presentations

---

- Exploring chordal sparsity in semidefinite programming with sparse plus low-rank data matrices, 2025 International Conference on Continuous Optimization, Los Angeles, California, U.S.
- A feasible method for general convex low-rank SDP problems, the 25th International Symposium on Mathematical Programming, Montreal, Canada
- A feasible method for general convex low-rank SDP problems, 2024 INFORMS Optimization Society Conference, Rice University, Houston, Texas, U.S.
- A feasible method for solving an SDP relaxation of the quadratic knapsack problem, 2023 INFORMS Annual Meeting, Phoenix, Arizona, U.S.
- Solving graph equipartition SDPs on an algebraic variety, The 10th International Congress on Industrial and Applied Mathematics, Waseda University, Tokyo, Japan.
- Solving graph equipartition SDPs on an algebraic variety, 2023 SIAM Conference on Optimization, The Sheraton Grand Seattle, Seattle, Washington, U.S.

## Recognitions

---

- PhD Conference Award 2023
- Best Graduate Researcher Award 2023
- Graduate Tutor Commendation letters
- SIAM Student Chapter Certificate 2024
- Louis Hsiao-Yun Chen Best Dissertation Prize 2025
